Skills

- HTML
- CSS
- JsvaScript
- React Js
- Tailwind
- Node Js
- MongoDB
- Express.js
- Redux Toolkit

Languages

- English: Proficient
- Arabic: Proficient
- Armenian: Intermediate

Profile

From the moment I produced "Hello World" in the console of my first applicatin I knew I was hooked into the world of software development. but software development has never been "just a job" for me, its offered an engaging challenge to continually learn and improve my skills in creating high-quality software .what started with a simple "hello World" has become a full-fledged passion that only gets more exciting as the years go by .

Work Experience

Movieapp(https://1movieapp1.netlify.app)

Simplified version of movie app which you get access to all the movies that you search for by doing api calls I manged the state and used different components and props in this application

bankWebsite(https://1bankwebsite1.netlify.app)

full responsive website in reactjs and tailwind this website was designed by fundamentals css properties like flex and grid also perfectly placed media queries for satisfactory responsiveness on all devices

wordle(https://1wordle1.netlify.app)

based on the wordle game the difference is this app using bank of words and the original wordle is once a day this one you can play how many times you want relies on context api to manage the state

admindashboard(https://theadmin-frontend.onrender.com)

full stack admin dashboard application using mern all the information is coming from backend and this is data that I saved into mongo database
